

LED diffuser

SKU: 100080693

Improve the visibility and look of your Crazyflie lighting with the Crazyflie™ LED Diffuser. Designed to attach seamlessly to both the Color LED Deck and the LED-ring Deck, it spreads and softens the light, extending visibility to the sides in addition to the usual top or bottom view. The lightweight plastic construction ensures minimal impact on flight performance while adding a smooth, even glow. Perfect for clearer visual feedback, improved visibility, or simply lighting up your Crazyflie in style.

1. Introduction

Attach the LED Diffuser to your Color LED deck or LED-ring deck to evenly spread and soften the light. It extends visibility to the sides while creating a smooth, even glow — perfect for improving visual feedback or adding a polished look to your drone's illumination.

2. Features

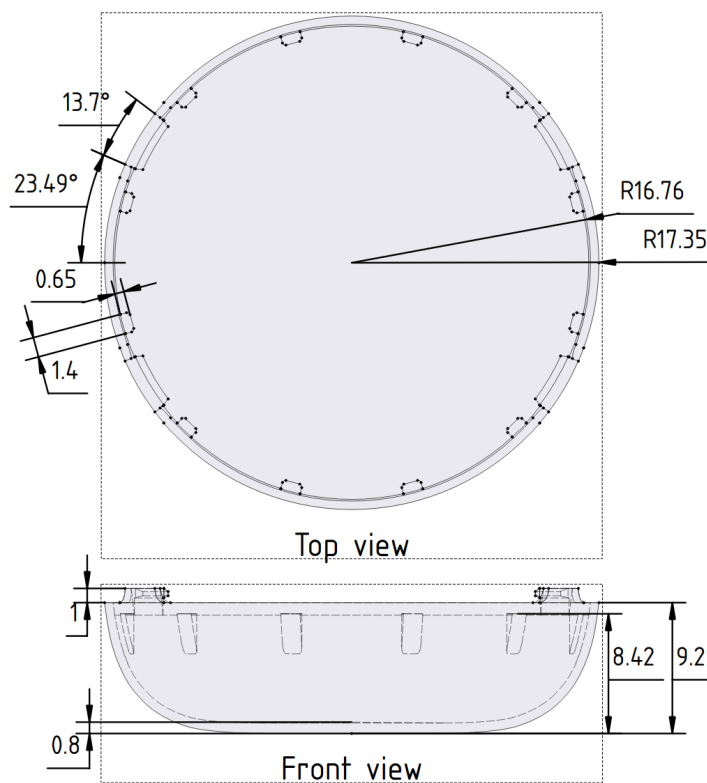

- Compatible with both versions of the Color LED deck and the LED-ring deck
- Optimized light and color diffusion for even, uniform illumination
- Designed for increased side visibility
- Snap-on mount for a secure fit
- Compact design that fits neatly under the Crazyflie
